

Release Notes

Prism Suite®
14.0.1

Prepared by the Product Management Team at New Boundary Technologies® for release with Prism Suite 14.0.1 maintenance releases (versions 14.0.1.62, 14.0.1.182)

System Requirements for Prism Suite 14.0.1

Prism Suite 14.0.1.maintenance release includes enhancements to the Prism Console and Package Editor, and addresses other minor issues.

Customer-Requested Product Enhancements

1. The *AD Folder* and *Operating System* fields are now available through *More Fields* when creating computer-related reports.
2. *Operating System* is now available through *More Fields* on the Managed tab.
3. Windows 7, 8, 8.1 and Windows Server 2012 and 2012 R2 are now available when creating OS-related configuration groups in the Console or Requirements/Installation Rules in Prism packages.
4. Microsoft SQL Server 2014 and 2014 Express are now supported platforms for installing Prism's channel database.

Minor bugs

1. Fixed an anomaly in how the Scan Agent dropdown list was sorted (Network Scan Configuration on the Assets tab).
2. Fixed an issue that caused some reports to open with broken filters.
3. Made corrections to the French version help and documentation.
